Academic Heraldry

The history of academic heraldry reaches back into the early days of the university. A statute of 1321 required that all "Doctors, Licentiates, and Bachelors" of the University of Coimbra wear gowns. In England, in the fourteenth century, the statutes of certain colleges forbade "excess in apparel" and prescribed the wearing of a long gown, which may have been counted necessary for warmth in the unheated buildings frequented by medieval scholars. Hoods were used to cover the head until later replaced by the skull cap and eventually by academic caps. Both Cambridge and Oxford have made academic dress a matter of university control to the inclusion of even its minor details; and in Laudian days in Oxford, any tailor who changed the authorized design "even by a nail's breadth" was punished by the vice-chancellor of the University. When American colleges and universities desired to adopt some suitable system of academic apparel, it seemed best to agree on a system which all might follow. Accordingly, there was held on May 16, 1895, at Columbia University, a conference of representatives of the boards of various interested institutions. From that meeting came a code of academic dress for the colleges and universities of the United States, which most institutions of higher learning have adopted.

Gowns

The academic gown for the bachelors degree has pointed sleeves and is designed to be worn closed. The gown for the masters degree has an oblong sleeve, open at the wrist. The sleeve base hangs down in the traditional manner. The rear part of its oblong shape is square cut, and the front part has an arc cut away. The gown is so designed to be worn open or closed. The gown for the doctors degree has bell-shaped sleeves and may be worn open or closed.

Colors

For all academic purposes, including trimmings of doctoral gowns, edging of hoods, and tassels of caps, the colors associated with the different academic disciplines are as follows:

Agriculture	Maize
Business	Drab
Education	Light Blue
Family Life	Maroon
Engineering	Orange
Humanities, Arts and Social Sciences	White
Natural Resources	Russett

Science
School of Graduate
Studies (EdD, PhD) Gold

Gold-Yellow

The white ribbon with the Greek Key on the robe of a graduate identifies an inductee into Phi Kappa Phi, the National Scholastic Society. Those wearing gray collars and a medallion are Mortar Board Senior Honor Society members, the National and Academic & Service Society. A gold braided cord draped over the cowl will distinguish a graduate of Honors.

Hoods

Academic hoods are worn by recipients of advanced degrees. The master degree hoods are three-and-one-half feet in length and are lined with the official color or colors of the college or university conferring the degree, which at Utah State University are navy blue and white, displayed in a heraldic chevron. The doctoral hood consists of a larger and longer assemblage of institutional color draped over the recipient's shoulders and falling well down the back. The binding or edging of the hoods is of velvet or velveteen, three inches wide and five inches wide for the masters and doctors degree, respectively.

Caps

Academic caps come in two forms: the traditional mortarboard (from Oxford), a square cap; and a soft cap which resembles an oversized beret (the Cambridge model). The mortarboard, used by Utah State University, is worn with a tassel. Black tassels designate any degree; colored tassels designate major field of learning, and gold tassels indicate doctors and governing officials of institutions.

Academic Procession

The commencement procession originates at Old Main and extends across the quad to the Library then north to the Spectrum. The procession is composed of three divisions: (1) color guard, University president, Regents and the Board of Trustees, administrative officers, and special guests; (2) the faculty; and (3) candidates for degrees, with candidates for advanced degrees in the lead and others in groups according to the degrees for which they are candidates. The procession will stop at the tunnel entrance to the Spectrum, the first two divisions dividing so that the candidates for graduation pass between them and enter the hall first.

Commencement Speaker Honorary Degree

Marian Wright Edelman

sees America's future in its children. □ As the founder and president of the Children's Defense Fund, she helps provide a strong and effective voice for the children of America who cannot vote, lobby, or speak for themselves. She has been an advocate for disadvantaged Americans her entire professional career. □ She is a graduate of Spelman College and Yale Law School and distinguished herself as the first African American woman admitted to the Mississippi Bar, directing the NAACP Legal Defense and Educational Fund office. Moving to Washington, D.C., she was counsel for the Poor People's March that Dr. Martin Luther King, Jr. organized before his death. She founded the Washington Research Project, a public interest law firm and the parent body of the Children's Defense Fund. □ Her lifework has been recognized and she is the recipient of many honorary degrees and awards. She has received the Albert Schweitzer Humanitarian Prize, the Heinz Award and was among the elite to be named a MacArthur Foundation Prize Fellow. □ She believes completely in the Children's Defense Fund's objective to "leave no child behind and to ensure every child a Healthy State, a Head Start, a Fair Start, a Safe Start, and a Moral Start in life with the support of caring parents and nurturing communities." □ For a life of vision and dedication, Utah State University is proud to bestow upon Marian Wright Edelman the honorary degree, **Doctor of Humanities**.

Honorary Degree

Jack Anderson

often credited with being "America's foremost investigative reporter," has been reporting on the turbulent waters of politics for 50 years in his syndicated "Washington Merry-Go-Round" column which appears in about 400 newspapers world-wide. □ Born in Santa Barbara, California in 1922, his family moved to Utah two years later. He got his first reporting job for the **Deseret News** at age twelve, writing later for the **Murray Eagle** and the **Salt Lake Tribune** before leaving Utah as a missionary for his church. □ His service with the Merchant Marines led to foreign correspondent work in China during World War II. He later served a stint in the Army writing for **Stars and Stripes** and Armed Forces Radio. □ He started his trademark "muckraking" in 1947 as a collaborator on the "Washington Merry-Go-Round" column where he advanced to co-author in 1965. He took over the column in 1969 and won the Pulitzer Prize for national reporting in 1972. □ In 1984 with the nation concerned over the shortage of scientists and mathematicians, he founded "Young Astronauts," using the allure of space travel to get youth interested in science and mathematics. □ Most recently, Anderson has lent his considerable insight and influence to help launch the Center for the School of the Future at Utah State University. He and President George H. Emert oversee this project which is aimed at improving both learning and character in America's classrooms. □ For his continuing zeal for championing a well-informed and educated society, Utah State University now confers upon Jack Anderson, the honorary degree, **Doctor of Communication**.

Honorary Degree

C. Stuart Brown

has ascended with distinction a long, winding path from being a compound commander for Japanese prisoners of war in World War II to eventually serving as chief justice of Wyoming's Supreme Court where his strong, clear light has warmed and guided Wyoming jurisprudence for more than a quarter century. □ Since he completed a bachelor's degree at Utah State University, then earned his Juris Doctor degree at the University of Utah, and went on to graduate school at Georgetown, he has followed a life of the law. He was admitted to the bar in both Utah and Wyoming the same year. He has served as state bar commissioner, city attorney, county attorney, prosecuting attorney, associate solicitor for the U.S. Department of Interior, member of the Board of Regents of the International Academy of Trial Judges, and chair of the Wyoming Judicial Conference. He also graduated from the National College of State Trial Judges and Military Judges School. □ Epitomized as what an excellent judge should be, he is one of few who could work a touch of humor into his formal legal decisions. To this day, his legal writings are read and respected for their scholarship, their **down-to-earth**, understandable, and humorous tone. □ He both lives and teaches principles of citizenship, that learning is a lifetime pursuit, and that one's education and station in life do not make him too qualified to perform simple acts of service for others. □ For his relentless efforts to serve and his exemplary career in the legal and judicial fields, Utah State University is proud to confer upon Justice C. Stuart Brown the honorary degree, **Doctor of Law**.

Honorary Degree

Tweesackdi Sesarweech

has committed a lifetime of learning and public service to improving agriculture, and thereby improving the lives of people in his native Thailand and other developing regions of Southeast Asia. □ After earning a degree in agriculture at Utah State University, he began his career as an agronomist with Thailand's Department of Agriculture Extension. He was recognized for his outstanding work and achieved positions of greater responsibility, serving as Director General of the Department of Agricultural Extension and of the Department of Livestock. □ In his current, cabinet-level position as Permanent Secretary of the Ministry of Agriculture and Cooperatives, he leads an industry that accounts for 11 percent of Thailand's gross domestic product in a country that has enjoyed three decades of impressive economic growth. Agricultural productivity in Thailand has increased at a rate sufficient not only to feed its increasing population but to also become an important agricultural exporter. □ Many have called him a "great friend to Thai farmers" for his efforts to aid them in procuring high quality beef and dairy cattle and to provide training for farmers as incentives to diversify Thai agriculture beyond an almost total reliance on rice production. □ He has been highly decorated for his outstanding service to his country and also serves as chairman of the Working Group of the Children's Development in Rural Areas Fund initiated by Her Royal Highness Princess Maha Chakri Sirindhorn. □ In addition to his numerous achievements in agriculture and government, he has been a key supporter of Utah State University's most outstanding international alumni chapter. □ In recognition of his devotion to public service, visionary leadership, and commitment to improving people's lives through education and opportunity, Utah State University is proud to confer on Tweesackdi Sesarweech the honorary degree, **Doctor of Agricultural Science.**

Honorary Degree

James L. Sorenson

*lives his profound belief that balance is the key to a successful, productive and meaningful life. This Utah entrepreneur carefully balances his enormously successful business interests, his wonderful home life and his extensive community involvement. □ With some 50 patents to his name, he has been a pioneer in the medical device industry for more than three decades and has created several other thriving businesses in various fields along the way. The tremendous success of the Sorenson Companies, including Sorencor, the Utah Biomedical Test Laboratory, DataChem Laboratories, Sorex Medical and Sorenson Laboratories, to name a few, confirms his well-deserved reputation as an innovative and creative trailblazer in several industries. □ He is an Idaho native who served his church on a mission and his country as a merchant marine. □ Despite the tremendous resources he has acquired through years of hard work, he has maintained a modest, low-profile lifestyle, choosing to climb stairs rather than take elevators. That metaphor has served as a guidepost and a challenge throughout his professional life. □ It has also instilled in him empathy for those who are forced to "take the stairs" in life. His considerable philanthropic legacy supports his deep-seated belief that all people are equal under God. He invests in society's future by working to eliminate bigotry, class distinctions and "tribal confusion." □ For his bold vision as one of our nation's preeminent entrepreneurs; for his unwavering support of individual worth, and for his unshakable belief in the value of lifelong learning, Utah State University is proud to confer upon James L. Sorenson the honorary degree, **Doctor of Science**.*

University Outstanding Graduate Mentor Award

William F. Campbell

Professor of Agronomy in the Department of Plants, Soils, and Biometeorology, is an excellent researcher who has devoted himself to developing each graduate student to be a better scientist than he is. □ Dr. Campbell's prior students attest to the commitment to research, the enthusiasm and scientific inquisitiveness, the brainstorming sessions, the encouragement to work independently, and the social support that have made him an outstanding mentor. □ Dr. Campbell has published 56 articles in refereed journals with graduate students, and 28 with his own advisees. Three of these articles have won national awards. Five of the 96 papers he has presented with USU graduate students have received awards for excellence. □ Along with nine regional and national research awards, Dr. Campbell has received the Outstanding Graduate Educator Award from the American society for Horticultural Science. Among the past students served so well by Dr. Campbell's mentoring are university professors, college deans, the director of research for a national seed production company, and a virus researcher who has made significant contributions to leukemia treatment. □ Utah State University is proud to honor William F. Campbell with the University Outstanding Graduate Mentor Award in 1997.

Eldon J. Gardner Teaching Award

Thomas J. Lyon

has left a truly extraordinary impact on his students. There are few faculty members at any university that have elicited the depth of respect and admiration that Professor Lyon has from his students. It is fitting that Professor Lyon's teaching here be described by his students in their own words, and former student Rick Bass, himself a noted writer, has described this enduring impact best. □ This is one of the things I cherish most about my relationship with Tom Lyon: the way he continues to influence and shape and instruct my life, twenty years after my first class from him. It is an instruction that deepens and grows each year. He is truly amazing. I can understand, given his vast intellect, how he is able to help teach "professional" writers such as myself. What amazes me--what I find nothing less than miraculous-- is that for so many years he did the same thing for young college students. When I think of the young man I was when I first encountered him and of the horrific limitations of my ability or even **desire** to learn, I have to say the man is a saint and a mule, both. It must have been the hardest kind of work. I would have liked to have been a better student for him: smarter, wittier, more ambitious, more engaged. But such is his generosity that he did not withhold anything, because of these shortcomings on my, and others' parts. He gave us everything. □ Professor Lyon will retire at the end of this academic year. He leaves two important legacies to Utah State University: a body of literary scholarship that has long been recognized as central to our understanding of the American West, and his students, whose lives have been transformed by his extraordinary teaching. □ Utah State University is proud to honor Thomas J. Lyon with the Eldon J. Gardner Teaching Award.

D. Wynne Thorne Research Award

J. Barre Toelken

defines, preserves and appreciates--these key terms portray the lifework of the writer, researcher, folklorist and educator. □ While folklore can be a discipline of minute focus, Barre Toelken has shown an interest as broad as our world. From ballads and folksongs to Native American culture, from Western folklore and culture to Japanese legends, his work truly spans the globe. □ His insights shape the field of study and his books are enjoyed by professionals and amateurs alike. His highly respected textbook, *The Dynamics of Folklore*, is regarded as one of the influential textbooks in the field. His work in Western American folklore and culture has focused on the issue of regionalism in the West and his research has come to the aid of at-risk communities. His impact on the study of ballads and folksongs is profound and has culminated in a major work, *Morning Dew and Roses: Nuances, Metaphor, and Meaning in Folksongs*. A life-long project, the book consolidates Toelken's insights and research into a volume that will, most likely, shape its field of study. □ At USU, Dr. Toelken continues to ensure that the Fife Folklore Archives expands and grows, retaining its place as one of the best folklore resources in the nation. Barre Toelken has contributed much to the intellectual life of this campus, the West and his discipline. □ For these outstanding accomplishments, Utah State University is proud to award J. Barre Toelken the D. Wynne Thorne Research Award.

E. G. Peterson Extension Award

Steven A. Dewey

is an Extension Specialist and professor of Weed Science in the Department of Plants, Soils, and Biometeorology. □ As State Weed Specialist, he provides leadership in organizing, managing, and supervising a far-reaching extension, education, and applied research program throughout the state of Utah. □ Dr. Dewey is known from the fields and wildlands of the Intermountain West to the halls of Congress in Washington, D.C., for his innovative approaches to the management of noxious weeds. As an example, Dr. Dewey developed an analogy using the principles of wildfire management to more effectively illustrate fundamentals of noxious weed management to federal land management agencies. He became a certified wildland fire fighter to learn first-hand about the many aspects of fire management, then merged that experience with his weed science training and experience to create what is now recognized nationally as the wildfire/weed management model. □ His work has pioneered a new vista of weed management on public lands, not just in Utah but throughout the United States. He has been called to testify before Congressmen, the Secretary of the Interior, and many national committees and panels regarding his work. He has trained numerous personnel in public land agencies and has worked with the U. S. Departments of Interior, Agriculture, Defense, Transportation, and Energy to create the current national strategy for invasive plant management. □ Dr. Dewey's impact is not limited to public lands, as students, faculty, and agricultural producers seek his guidance and advice, whether in classrooms, farms, or ranches. Utah farmers estimate that weed control information from Dr. Dewey's extension program saves them more than one quarter million dollars annually. □ Dr. Dewey also is co-author of the book, *Weeds of the West*, a highly acclaimed weed identification publication. Dr. Dewey has been named a Fellow of Western Society of Weed Science and has received numerous state, regional and national awards. Dr. Dewey truly exemplifies the balanced, complete, and effective Extension Educator. □ Utah State University is proud to award Steven A. Dewey the E. G. Peterson Extension Award.

Teaching Excellence Awards

Through an extensive selection process involving both students and faculty in the various academic colleges, eight members of the faculty have been designated for special recognition for excellence in teaching representing the eight colleges of the University: Agriculture; Business; Education; Engineering; Family Life; Humanities, Arts and Social Sciences; Natural Resources; and Science. From among the eight, The Eldon J. Gardner Teaching Award recipient is chosen; the seven remaining follow:

College of Agriculture

Tyler Bowles

is a truly superb teacher, as well as student mentor, professional colleague, and teaching ambassador for the College of Agriculture. His classes and instruction are consistently rated among the highest in the College and University. His teaching has had a high impact whether measured quantitatively or in terms of quality. During the past three years, he has taught virtually every economics class in the undergraduate core with challenging rigor, infectious good humor, and uniformly excellent student evaluations. His teaching expertise cuts across subject areas from Agricultural Finance and Accounting to Money and Banking and International Economics for Business. Dr. Bowles' classes typically have large enrollments. He is one of a very select group of teachers who maintains a high level of teaching effectiveness, not only in selective graduate and specialty classes but also in large classes where a majority of students could be described as a "captive audience." Student enrollment in the agribusiness degree specialization has increased significantly since Dr. Bowles became a major player as teacher, advisor, and role model. He is sensitive to the needs and aspirations of individual students and maintains an abiding concern for their personal and professional success. His commitment to students epitomizes the spirit and tradition of Utah State University.

College of Business

Edwin R. Stafford

is an assistant professor of marketing and has only been teaching at USU since 1993. In that time, however, he has built a reputation as a student-oriented, service-oriented professor. After graduating from San Jose State University where he studied both marketing and opera, he earned a M.B.A. from Santa Clara University. He obtained a Ph.D. from Arizona State University, where he was awarded the 1993 Doctoral Teaching Award in his department and led teaching seminars for in-coming graduate students. Since coming to USU, the students' evaluations of his teaching have consistently ranked him at the top or near the top of his department in the College of Business. In his first year of teaching, he was a nominee for the 1994 USU International Student Council's Professor of the Year Award. Dr. Stafford has authored nine scholarly articles and has presented 11 papers at top professional conferences, primarily in the area of international strategic "green alliances." He has conducted research and published articles with both undergraduate and graduate students. Dr. Stafford teaches the undergraduate and graduate-level marketing strategy courses, where students conduct "hands-on" marketing audits for organizations. A strong emphasis is placed on using electronic databases and applying strategy analysis frameworks to empower students with the ability to conduct similar projects on the job. In this era of rapid international business development, Dr. Stafford brings his Asian, Russian, and European travel experiences as well as his corporate environmentalism research into the classroom to tutor students on emerging cross-cultural and ecological issues that will impact global marketing into the 21st century.

College of Education

Julianne Abendroth-Smith

came to USU in 1993 exceptionally well prepared with a strong background in biomechanics and kinesiology. Her doctoral dissertation topic was "Stride Adjustment During a Running Approach to a Force Plate." HPER is a "teaching department" and Julianne is an exceptional teacher. She is fast becoming a notable researcher and scholar. Her research strengths are broad and well-balanced between basic and applied research. Her inquisitive nature has sparked student interest in exploring research and she has had two students receive a USU Undergraduate Research and Creative Opportunities (URCO) grant. Since arriving at USU, Julianne has been single-handedly building and outfitting a Biomechanics Laboratory through her own efforts and grant awards. She serves as a "virtual mentor" for the American Society of Biomechanics Student Network and answers e-mail queries put forth by students from all over. Her professional focus includes aspirations of success in the area of teaching, scholarly activity, and service. Julianne is an outstanding example of a university assistant professor providing exceptional service to her profession, her colleagues, this institution and her students.

College of Engineering

Christine E. Hailey

joined the Department of Mechanical and Aerospace Engineering in 1994. Coming from Sandia National Laboratories in Albuquerque, New Mexico, she is an experienced practical engineer and plays an active role on national technical committees which attest to her technical expertise. These attributes enable her to develop and authoritatively teach new courses and consistently deliver the very best. She is dynamic, exciting, entertaining, and motivating in the classroom. She gestures, engages, elicits response, and otherwise fully involves her audience. With her innovative ideas she is one who not only is accommodating change, she is also facilitating change and leading the charge as she incorporates new technologies into her teaching. She is creating interactive distance deliverable learning modules that are lighting the way for the rest of us.

College of Family Life

Noreen B. Schvaneveldt

joined the Department of Nutrition and Food Sciences in 1980 after working for several years as a Registered Dietitian. Her teaching methods come from having "first hand" knowledge of the subject matter. She puts constant effort into structuring course objectives and student experiences so that students are highly marketable upon graduation. Her courses are rigorous and demanding, constantly challenging students to think and apply rather than just memorize. She expects and receives excellent performance from her students. Her creative teaching and leadership skills have helped achieve and maintain an outstanding dietetics education program at Utah State University. Noreen has a very optimistic personality and her enthusiasm and energy level motivate those with whom she associates. She is a very generous person who delights in seeing her students and colleagues succeed. Individuals whom she has mentored are now leaders in research, education and clinical practice. Her numerous contributions to the field of dietetics as well as those of her students have made a great impact. She is an excellent role model and personifies effective teaching.

College of Natural Resources

Mark W. Brunson

joined the faculty of the Forest Resources Department in 1992. Many students in his Recreation Resource Management courses have commented on the influence that Dr. Brunson has had on the direction of their lives academically. In the classroom, Dr. Brunson teaches with enthusiasm, challenging the students to think about the material he is presenting in a broader context. Mark incorporates his diverse background and experience, creating an interesting learning experience for the students, one in which they can readily see practical application of the ideas being taught. Mark's dedication goes beyond the classroom. He is actively involved with the student clubs as the advisor to the Earth Resources Club and an active supporter of the USU Forestry Club and student chapter of the Society of American Foresters. In all he does, Mark continually demonstrates his commitment to excellence in education.

College of Science

Jill A. Marshall

has maintained the heaviest teaching load in the Physics Department since joining the faculty in 1994. Her courses in introductory physics and various aspects of astronomy invariably yield enrollments in excess of 100 students. Despite the large number of students she teaches and the high standards she sets, her students uniformly praise her for caring that each of them succeeds, for the clarity and relevance of the real-world examples she brings to them, and for performing the magic of transforming the atmosphere of her classroom into something closer to a small, informal seminar. Devoted to helping students experience the principles of physics through hands-on discovery, Professor Marshall has been at the forefront at Utah State University in introducing peer instruction into large audience settings. She has also been pioneering ways of combatting the gender bias that pervades traditional textbooks in physics, an effort that resulted in her developing and distributing her own textual materials. Supported by funding from the National Science Foundation, Professor Marshall has embarked on a systematic study of the efficacy of discovery learning and gender balance for students in introductory physics intending to be elementary education teachers. Her other professional endeavors include a long involvement in "Expanding Your Horizons", a program designed to reinforce the interests of young girls in learning science, and numerous publications in space physics and electronic instrumentation.
